

The screenshot shows a Google Colab notebook titled "Assignment#5.ipynb". The code cell contains a Python script for a phonebook application. The script includes a main function that runs when the file is executed directly. It performs the following actions:

- Adding contacts: Dani, Alma, Bryan, Juan, and Emely.
- Looking up numbers: Found Dani! Call them at: 555-7890, Found Alma! Call them at: 555-1234, Found Bryan! Call them at: 555-5678, Found Juan! Call them at: 555-2468.
- Observing the entire phonebook: Phonebook content (Alphabetical Order): Alma: 555-1234, Bryan: 555-5678, Dani: 555-7890, Emely: 555-1357, Juan: 555-2468.
- Extra(bonus) removing someone: Before removal: Phonebook content (Alphabetical Order): Alma: 555-1234, Bryan: 555-5678, Dani: 555-7890, Emely: 555-1357, Juan: 555-2468. Removing Juan from phonebook. After removing Juan: Phonebook content (Alphabetical Order): Alma: 555-1234, Bryan: 555-5678, Dani: 555-7890, Emely: 555-1357.

The output of the script is displayed in the cell below the code. A notification in the bottom right corner indicates "Assignment#5 - BST" is due in 3 hours.
